## PROFILE

Adept Q.A Software Testing Engineer from Syncfusion Software Services Kenya Ltd., I excel in manual and automated testing, and enhancing product quality by identifying and resolving defects before release. Skilled in test case design and functional testing, my proactive approach and keen eye for detail have significantly contributed to the seamless performance of Bold Bl and BoldSign applications.

## EXPERIENCE

05/2024 – Present  
Kisumu, Kenya

### Syncfusion Software Services Kenya Ltd.

LEVEL 2 SOFTWARE TESTING ENGINEER

- Performed functional, regression, system, performance, and user acceptance testing in Syncfusion's Bold Bl and BoldSign applications.
- Participated in product design review to provide input on functional requirements, product designs, schedules, and potential problems.
- Installed, maintained, and used software testing programs.
- Used version control systems such as Git for tracking changes made during the SDLC process.
- Created detailed bug reports and tracked them through resolution.
- Modified existing software to correct errors, allowed it to adapt to new hardware, and to improve its performance.
- Collaborated with developers to ensure that all defects were properly addressed before product release.
- Deployed application builds into various environments including staging and production, for further testing.
